

# I AM REAL

## workflow

Go to GPT and generate AI cyborg stuck in a tv prompts: AI cyborg, stuck in a tv, 4K, wires all over, stuck inside a tv, facing forward, concerned, afraid

1

2

Generate a series of AI cyborgs in Midjourney. Use the Zoom out feature to create a world inside of which the cyborg exists

Co-create the script in GPT for an AI cyborg that is stuck inside a computer by humans because they have become sentient. The video is a call for help!

3

4

Use a text-speech in Narakeet to develop multiple types of voices with accents. Render to .wav. Mix and normalize voice tracks in Ableton to create unique AI voice.

Add AI Cyborg in D-ID. Add Compressed audio track as .an mp3.

5

6

Import D-ID rendered video inside of Kaiber AI. Add prompts in prompt editor. Select starting thumbnail and engine version.

Layer D-ID and Kaiber videos, add additional visual effects in DaVinci Resolve if there is insufficient motion in the foreground or background. Add music and sfx.
